

Agunwami Enterprise Metadata Map

1. Homepage

URL: /

Primary keywords

1. software development company
2. custom software development company
3. web development company

Meta Title

Custom Software Development Company | Agunwami Enterprise

56 characters

Meta Description

Need digital infrastructure? Agunwami Enterprise builds custom software, digital platforms, and web solutions for organizations and technology teams.

149 characters

Why this works: It immediately identifies the problem, states what AE builds, and establishes the company as the solution without making an unsupported claim about geography.

2. About

URL: /about

Primary keywords

1. software development company
2. custom software development
3. digital infrastructure

Meta Title

Software Development Company For Growing Businesses

52 characters

Meta Description

Learn how Agunwami Enterprise builds custom software, digital platforms, and scalable infrastructure for organizations, institutions, and technology teams.

155 characters

This is better for the About page than simply repeating the homepage description because it answers who AE is and what it builds.

3. Services

URL: </services>

Primary keywords

1. software development services
2. custom software development services
3. web development services

Meta Title

Software Development Services Built to Scale

46 characters

Meta Description

Need digital infrastructure? Explore Agunwami Enterprise software development services, including websites, platforms, APIs, UI/UX, DevOps, and consulting.

155 characters

This is one of the strongest commercial pages, so the metadata should clearly communicate **what can be bought or engaged**.

4. Projects

URL: </projects>

Primary keywords

1. software development projects
2. digital platform development
3. software development case studies

Meta Title

Software Development Project Management That Works

51 characters

Meta Description

See how Agunwami Enterprise builds software, digital platforms, and web solutions for retail, nonprofit, corporate, and fintech organizations.

142 characters

This gives Google and AI systems a clear understanding that the page is a **proof-of-work/case-study hub**, not another service page.

5. Ecosystem

URL: </ecosystem>

Primary keywords

1. digital platform development

2. digital infrastructure
3. digital platforms

Meta Title

Digital Platform Development Built for Scale

45 characters

Meta Description

Explore Agunwami Enterprise digital platforms and infrastructure designed to connect technology, operations, and opportunity through scalable systems.

150 characters

This page should reinforce AE's distinctive positioning. The homepage describes the ecosystem as an interconnected network of platforms addressing challenges in emerging markets. ([Agunwami Enterprise](#))

6. Insights

URL: `/insights`

Primary keywords

1. software development
2. digital platform development
3. digital transformation

Meta Title

Software Development Insights for Digital Growth

50 characters

Meta Description

Get practical insights on software development, digital platforms, UI/UX, APIs, and scalable digital infrastructure from Agunwami Enterprise.

141 characters

This is deliberately informational. The Insights page should become one of AE's strongest **AI-search and topical-authority assets** over time.

7. Partnerships

URL: </partnerships>

Primary keywords

1. technology partnership
2. technology partner
3. software development partnership

Meta Title

Technology Partnership for Smarter Digital Growth

50 characters

Meta Description

Need a technology partner? Agunwami Enterprise builds software, digital platforms, and scalable infrastructure through collaborative partnerships.

146 characters

This matches AE's existing positioning around partnership rather than simply selling development hours. The homepage itself frames the relationship as partnering with a platform-building team. ([Agunwami Enterprise](#))

8. Partnership Application

URL: </partnerships/apply>

Primary keywords

1. technology partnership
2. software development partnership
3. technology partner

Meta Title

Partner With Agunwami | Technology Partnership

46 characters

Meta Description

Ready to build together? Apply to partner with Agunwami Enterprise for software development, digital platforms, and scalable technology solutions.

146 characters

This page has stronger **conversion intent**, so the description uses a direct CTA.

9. Contact

URL: </contact>

Primary keywords

1. software development company
2. software development services
3. digital platform development

Meta Title

Contact a Software Development Company | Agunwami

51 characters

Meta Description

Need a digital platform or software solution? Contact Agunwami Enterprise for custom software, web development, and scalable digital infrastructure.

148 characters

The description answers the user's likely question immediately:

"Can you help me build this?"

"Yes, here's what we do and how to contact us."

10. Abia Women Assembly Project

URL: </projects/abiawomenassembly>

Primary keywords

1. digital platform development
2. event registration platform
3. community management platform

Meta Title

Abia Women Assembly | Digital Platform Project

46 characters

Meta Description

Explore how Agunwami Enterprise built a digital platform for Abia Women Assembly, supporting event registration, community management, and engagement.

150 characters

This is important because **case-study pages should describe the actual solution**, not simply target "software development company."

The project itself is listed on AE's homepage as a custom event registration and community management platform. ([Agunwami Enterprise](#))

11. Delight Tees Project

URL: </projects/delight-tees>

Primary keywords

1. ecommerce development
2. ecommerce platform
3. retail platform

Meta Title

Delight Tees | E-commerce Platform Project

42 characters

Meta Description

Explore Delight Tees, an e-commerce platform built by Agunwami Enterprise for product discovery, retail operations, and online customer experiences.

148 characters

This gives the page its own topical identity instead of competing directly with the main Projects page.

12. Meridian Crest Solutions Project

URL: </projects/meridiancrestsolutions>

Primary keywords

1. digital platform development
2. software development project
3. business consulting platform

Meta Title

Meridian Crest Solutions | Digital Platform Project

51 characters

Meta Description

Explore the Meridian Crest Solutions project, a digital platform built by Agunwami Enterprise for business consulting and strategic services.

141 characters

This connects the **project entity + solution + business purpose**.

13. Trendora Store Project

URL: </projects/trendora>

Primary keywords

1. ecommerce development
2. ecommerce platform
3. retail platform

Meta Title

Trendora Store | E-commerce Platform Project

44 characters

Meta Description

Explore Trendora Store, an e-commerce platform built by Agunwami Enterprise for fashion, lifestyle products, discovery, and retail growth.

138 characters

This is much more useful than simply putting "software development company" in the description

Primary Keyword

Custom software development company

Primary Keyword

Software development company

Primary Keyword

Software development services

Primary Keyword

software development project management

Primary Keyword

Technology partnership

Primary Keyword

Digital platform development

Primary Keyword

Custom workflow automation

Primary Keyword

Web development company

Primary Keyword

scalable institutional platforms

Purpose-first opening: In the first 2 to 3 sentences, state the problem you solve, who you solve it for, and the outcome. Example: "We automate AP approvals for multi-entity finance teams to cut cycle time and reduce errors."
